

Our Work

Bally Ribbon Mills

ballyribbon.com

Bally Ribbon Mills – a narrow fabrics and advanced composites design and manufacturing company – is at the leading edge of the composites industry providing work for NASA and the USAF. Brunello designed and developed a custom theme and fully integrated a CMS to facilitate their expanding web presence.

Our Work

Bicycling Magazine

bicycling.com

Rodale is upgrading all of their properties to run as Drupal 7 multisites on the Acquia Enterprise Cloud, and relaunching the sites with new responsive designs. To help with the effort, they partnered with Brunello for our experience working with Acquia and for the redesign and development of Bicycling.com – the online home of the world's largest cycling magazine.

Brunello was responsible for the responsive design, style guides, and front-end development.
